Education

Vardhaman College of Engineering

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2024 – 2028

Hyderabad, Telangana

T.S.W.R. Junior College (Boys)

Intermediate (MPC)

2022 – 2024

Yellareddy, Kamareddy, Telangana

Projects

RaituSevak360 | *AI, React.js, Node.js, MongoDB* [GitHub]

2025 – Present

- Developing an AI-powered agriculture assistance platform designed to support farmers in making informed farming decisions.
- Integrated crop advisory, weather information, government scheme assistance, and agricultural equipment booking into a unified platform.
- Developed AI-based features for crop disease identification and personalized recommendations based on farming requirements.
- Implemented a farmer-focused marketplace connecting farmers with buyers, sellers, and agricultural service providers.
- Focused on using AI and digital technologies to improve agricultural decision-making and access to farming services.

Viloop | *React.js, Node.js, MongoDB, Express.js* [GitHub]

2026 – Present

- Developing a smart village digital platform that connects rural citizens with essential services, information, and local opportunities.
- Designed a centralized platform to provide easy access to government schemes, agricultural resources, healthcare services, and community information.
- Implemented features to help users access, manage, and update relevant village information and services through a unified platform.
- Developed a local marketplace to enable buying and selling of products and services within the rural community.
- Focused on improving digital accessibility and simplifying access to essential services for rural communities.

MemShield | *Python, Machine Learning, FastAPI, React, AES-256, UPI* [GitHub]

2026 – Present

- Developing an AI-powered security platform to protect **UPI and digital banking transactions** from fraud and financial threats.
- Built a real-time transaction analysis pipeline to detect **suspicious activity, fraud risks, and sensitive financial data**.
- Implemented **masking, tokenization, AES-256 encryption, access control, and risk-based blocking** for secure financial data handling.
- Designed a modular **FastAPI + React** architecture integrating transaction monitoring, AI risk analysis, banking security rules, and audit logging.

Technical Skills

Programming Languages: Java, Python, C , SQL

Web Technologies: HTML, CSS, Bootstrap

Databases: MySQL

Developer Tools: VS Code, Git, GitHub, Android Studio, Eclipse

Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Areas of Interest: Full-Stack Development, Artificial Intelligence, Machine Learning, Data Structures and Algorithms, Agricultural Technology, Rural Development, Software Development

Coding Profiles

- GitHub:** Active contributor with projects including Viloop, RaituSevak360, and MemShield.
- LeetCode:** Solved problems in Data Structures and Algorithms.
- HackerRank:** Earned certifications in Java, SQL, and Problem Solving.
- CodeChef:** Participated in competitive programming contests and improved problem-solving skills.
- GeeksforGeeks:** Practiced DSA and programming concepts through coding challenges.
- Codeforces:** Practiced competitive programming and solved algorithmic problems.

Certifications

Build Your Own Static Website <i>CCBP 4.0 Academy</i>	2025
Responsive Web Design Certification <i>CCBP 4.0 Academy</i>	2025
Model Context Protocol (MCP) Project <i>NxtWave CCBP 4.0 Academy</i>	2025
Introduction to Databases <i>CCBP 4.0 Academy</i>	2026
Python Programming Certification <i>CCBP 4.0 Academy</i>	2025
Build and Launch Your MVP Workshop Project <i>NxtWave CCBP 4.0 Academy</i>	2026
